Indonesia Sustainable Energy Week (ISEW) 2024

United Towards a Sustainable FutuRE: Advancing the Energy Transition for Indonesia Emas and Net Zero Emissions

Jakarta, 26 August 2024 – The Ministry of National Development Planning/ Bappenas and the Ministry of Energy and Mineral Resources (MEMR) in collaboration with the Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH and other German-funded implementing organizations, are pleased to announce the launch of Indonesia Sustainable Energy Week (ISEW) 2024. This landmark event will take place from September 10th to 13th, 2024 in Jakarta.

ISEW 2024 will serve as a crucial platform for high-level dialogues between the Indonesian and German governments, to foster a global and national energy transition. The event will also bridge the gap between policymakers and the public, including civil society, academia, youth groups, and other non-energy stakeholders to discuss and bring together energy transition topic as a multi-stakeholder's approach. Additionally, ISEW 2024 aims to enhance awareness of viable technology, policy, and business solutions for Indonesia's energy transition among the public and private sectors and communities. This agenda will also showcase the amazing energy cooperation with the Government of Indonesia, embracing the Indonesia Vision 2045 (Indonesia Emas).

"National guidance, strategic planning, inclusive and international cooperation are key to achieving a sustainable future. By working together, we can turn our vision into reality and lead the way towards a greener, more sustainable Indonesia." said **Taufiq Hidayat Putra**, Director of Electricity, Telecommunications and Informatics, Ministry of National Development Planning/ Bappenas.

"The energy transition through new and renewable energy is vital for Indonesia's future. Through collaboration and innovative solutions, we can achieve our ambitious goals and ensure a sustainable and prosperous future for all Indonesians," said **Sahid Junaidi**, Secretary of the Directorate General of New, Renewable Energy, and Energy Conservation (EBTKE), Ministry of Energy and Mineral Resources.

"Germany recognizes Indonesia as a key partner in combating climate change. We are committed to supporting Indonesia's ambitious energy transition goals through collaborative projects and knowledge sharings. We believe that this collaboration between Indonesia and Germany is crucial to achieving a sustainable and prosperous future for both our nations and the world" said **Lisa Tinschert**, Director Energy Programme, GIZ Indonesia/ASEAN.

ISEW 2024 will feature a diverse range of sessions and activities, including keynote speeches, panel discussions, workshops, and exhibitions. The event will cover a wide array of topics related to sustainable energy, including renewable energy integration, energy efficiency, sustainable finance, and just energy transition.

Stay tuned and visit our website for more information and to register: <https://isew.energyhub.id/>

We invite all stakeholders to join us at ISEW 2024 to advance the energy transition for Indonesia Emas and Net Zero Emissions.

About ISEW

The Indonesia Sustainable Energy Week (ISEW) is an annual stakeholder forum focusing on sustainable energy issues. It serves as a platform for dialogue, exchange of ideas, and innovative thinking to advance the transformation of Indonesia's energy system.

About the Organizers

The Ministry of National Development Planning (Bappenas) is responsible for national development planning.

The Ministry of Energy and Mineral Resources (MEMR) is responsible for the formulation and implementation of policies in the energy and mineral resources sectors.

GIZ's Energy Programme Indonesia/ASEAN acts as trusted partner and technical advisor to the Government of Indonesia for the transition towards a sustainable energy system. Taking a stakeholder-inclusive approach, the Energy Programme works with civil society, private sector, and local communities, while combining national advocacy with regional action. Guided by sustainability as a principle, GIZ supports a just and affordable energy transition for all affected stakeholders and regions, while making sure environmental impacts are minimized or eliminated. The GIZ Energy Programme further strives to demonstrate the economic benefits of a transition towards a RE-based power sector while promoting energy conservation, including improved energy security and industrial competitiveness.
